

Magnetic particle testing

**Magnetic connectors for
MT-testing with high current**

MULTIPULS-1001-MP

Magnetic connectors MULTIPULS-1001-MP

- Via the magnetic connectors MULTIPULS-1001-MP high currents can be applied to the specimen for magnetization
- High magnetic force of the connectors allows the use of thick Cu-caps for long service life
- Quick release fastener for power cables
- Easy attachment of the connectors at the specimen, no additional fastening of cables required
- Secure current flow into the specimen without sparks, at rated currents up to 13.000 amps
- Compact, low weight magnetic connectors make testing easy
- Color labels for easy allocation of cables
- Stainless steel fasteners for Cu-caps
